- (c) no part of the proceeds of any subsequent resale, disposal or use of the goods by the buyer shall accrue directly or indirectly to the seller, unless an appropriate adjustment can be made in accordance with the provisions of paragraph 7 (1) of this Schedule; and
- (d) the buyer and seller are not related as defined in paragraph 16 (2) (c) of this Schedule and if related, that buyer has proved to the satisfaction of the Board that the relationship has not influenced the price of the goods by showing that-

 - (ii) the customs value of identical or similar goods as determined under the provisions of paragraph 4 of this Schedule in a transaction between unrelated persons, at or about the same period of time, closely approximates to the price of the goods to be valued;
 - (iii) the customs value of identical or similar goods as determined under the provisions of paragraph 5 of this Schedule in a transaction between unrelated persons, at or about the same period of time, closely approximates to the price of goods to be valued.

2. Transaction value of identical goods

(1) If the Customs value of and goods imported into Nigeria cannot be determined under the provisions of paragraph 1 of this Schedule, the Customs value of the imported goods shall be transaction value of identical goods already accepted under paragraph I of this Schedule sold for export to Nigeria and exported at or about the same time, at the same commercial level and in substantially the same quantity, as the goods being valued, adjustment having been made under paragraph 10 (1) and (2) of this Schedule to take account of significant difference in costs and charges between the imported goods and the identical goods arising from differences in distances and modes of transport.

(2) Where identical goods as mentioned in subparagraph (1) of this paragraph are found but are not at the same commercial level and in substantially the same quantity as the goods being valued, the transaction value of the goods shall still be used as the Customs Value of the goods being valued, provided that-

(a) adjustment can be made by demonstrated evidence to take account of the differences attributable to commercial level and quantity; and

(b) where the adjustment of the transaction value of the identical goods as stated in this subparagraph leads to a value different in figure from the transaction value already accepted for the identical goods under paragraph 1 of this Schedule, the higher value or figure shall be used as the customs value of the goods being valued.

3. Transaction value of similar goods

(1) If the Customs value of any goods imported into Nigeria cannot be determined under the provisions of paragraph 2 of this Schedule, then the customs value of the imported goods shall be the transaction value of similar goods already accepted under paragraph 1 of this Schedule sold for export to Nigeria and exported at or about the same time, at the same commercial level and in substantially the same quantity, as the goods being valued, adjustment having been made under paragraph 10 (1) and (2) of this Schedule to take account of significant difference in cost and charges between the imported goods and the similar goods arising from differences in distances and modes of transport.

(a) adjustment can be made by demonstrated evidence to take account of the differences attributable to commercial level and quantity;

(b) where the adjustment of the transaction value of the similar goods as stated in this subparagraph leads to a value different in figure from the transaction value already accepted for the similar goods under paragraph 1 of this Schedule, the higher value or figure shall be used as the customs value of the goods being valued.

4. Sale value

(1) Where the customs value of goods imported into Nigeria cannot be determined under the provisions of paragraph 1, 2 or 3 of this Schedule, the customs value shall be based on the unit price at which the imported goods, identical or similar goods (in that order) are sold in Nigeria in the conditions as imported, in the greatest aggregate quantity, at or about the time of importation of the goods being valued, to persons who are not related to the persons from whom they buy those goods, subject to deductions for the following-

(2) Where identical or similar goods to the goods being valued are used to calculate the customs value as mentioned in subparagraph (1) of this paragraph, the goods should have been imported into Nigeria at the earliest date but not later than 90 days from the date of importation of the goods to be valued.

(3) If the goods imported into Nigeria, identical or similar goods are not sold in Nigeria in the condition as imported, the Customs value of the goods shall be based on the unit price at which the imported goods, after further processing, are sold in the greatest aggregate quantity to persons in Nigeria, who are not related to the persons from whom they buy those goods, due allowance being made for the value added by the processing and the deductions provided for in subparagraph (1) of this paragraph.

6. Reasonable value

(2) The conversion rate to be used shall be that in effect at the time of entry of the goods into Nigeria.

10. Delayed valuation

(2) If, after receiving further information, or in the absence of a response, the Board still has reason to doubt the truth or accuracy of the declared value, it shall be deemed, having regard to the provisions of paragraph 6 (1) of this Schedule, that the Customs value of the imported goods cannot be determined under the provisions of paragraph 7 (1) of this Schedule but the Board shall, before taking final decision, communicate to the buyer, in writing if requested, its grounds for doubting the truth or accuracy of the particulars or documents produced and the buyer shall be given a reasonable opportunity to respond.

14. Application of GATT 1994

For purposes of the interpretation of Customs valuation under this Act, the provisions of Article VII of the General Agreement on Tariffs and Trade 1994 as contained in the Agreement on the implementation of Article VII, together with all the notes to the Articles, and all the Annexes to those Articles, shall apply.

All mash tuns, underbacks, worts receivers, coppers, heating tanks, coolers, collecting and fermenting vessels or other vessels used for the brewing of beer shall be so placed and fixed as to admit at all times of the contents being accurately ascertained by gauge or measure, and shall not be altered in shape, position or capacity without fourteen days' notice in writing to the proper officer.

(3) When sorts shall have commenced running into a collecting or fermenting vessel, the whole of the produce of that brewing shall be collected within twelve hours.

9. Brews to be kept separate

(1) Every brewer shall keep the total produce of a brewing separate from the produce of any other brewing for the space of 24 hours, unless an account of the first mentioned brewing is sooner taken by the proper officer.

(2) A brewer shall not mix the produce of one brewing with that of any other brewing unless he has given twelve hours' previous notice in writing to the proper officer, and he shall specify in writing the quantity and gravity of the worts when mixed, but a brewer having weak worts of an original gravity not exceeding 1025 degrees may, if he thinks fit, reserve them for mixing with the worts of his next brewing, but in such case he shall keep all such weak worts in the coppers, heating tanks or other vessels entered for the purpose.

(3) Whether or not fermentation has ceased, a brewer shall not transfer a brewing from one fermenting vessel to another fermenting vessel unless he has given twelve hours' previous notice in writing to the proper officer.

11. Possession of sugar

A brewer shall not have any sugar in his possession elsewhere than in the sugar store, mash tun or other vessel entered for dissolving sugar, or in the course of removal thereto.

F-Charge of excise duty on beer

12. Excise duty

(1) The excise duty in respect of beer brewed by a brewer shall be charged and paid in accordance with the following provisions of this regulation.

(2) In respect of each brewing, duty shall first be charged by reference to the quantity and original gravity of the worts produced, as recorded by the brewer in pursuance of regulation 5 of these Regulations or as ascertained by the proper officer, whichever quantity and whichever gravity is the greater.

(3) There shall be ascertained in respect of each brewing-

- (a) the quantity of worts of an original gravity of 1055 degrees which is the equivalent of the worts produced; and
- (b) the quantity of worts of that gravity deemed to have been brewed from the material used calculated in accordance with regulation 13 of these Regulations,

and if the quantity mentioned in paragraph (b) of this regulation, less four per cent, exceeds the quantity mentioned in sub-paragraph (a) of this paragraph, duty shall in addition be charged on the excess.

(4) In respect of accidental loss and waste as arises in the brewing of beer, a deduction of six per cent shall be made from the quantity of worts on which duty is to be charged.

(5) For the purpose of paragraph (3) (a) of this regulation, the equivalent therein mentioned shall be taken to be the quantity of the worts produced-

- (a) multiplied by the number less 1,000 of the degrees representing their original gravity;
and
- (b) divided by 55.

(6) If, at any time while any worts are in the collecting or fermenting vessels at a brewery, the original gravity of the worts is found to exceed by five or more degrees the gravity recorded by the brewer in pursuance of regulation 5 of these Regulations or that ascertained by the proper officer, those worts may be deemed to be the produce of a fresh brewing and charged with duty accordingly.

(7) Subject to paragraph (8) of this regulation, the amount payable in respect of duty shall become due immediately the worts are collected in a storage vessel already for bottling.

(8) The Board may cause the charge to be made up at the close of each month in respect of all the brewing during that month and, in that case, the aggregate of the quantities of the worts deemed to have been brewed from the material used shall be treated as worts produced or deemed to have been brewed in one brewing, and the Board may, if it thinks fit, allow payment of the duty to be deferred upon such terms as it sees fit but so that the date of payment shall not be later than the 21st day of the month next following that in which the duty was charged.

13. Ascertainment of worts

(1) For the purpose of ascertaining the quantity of worts of an original gravity of 1055 degrees deemed to have been brewed from the materials used, a brewer shall be deemed to have brewed 36 gallons of worts of the said gravity for every unit of materials recorded by him in pursuance of regulation 5 of these Regulations or used by him in any brewing.

(2) For the purpose of paragraph (1) of this regulation, the expression "**unit of materials**" means-

- (a) 84 pounds weight of malt or com of any description;
- (b) 56 pounds weight of sugar; or
- (c) a quantity of malt, com and sugar or any two of those materials, which by relation to sub-paragraphs (a) and (b) of this paragraph is the equivalent of either of the quantities mentioned in those paragraphs.

(3) Where any materials used for brewing by the brewer are proved to the satisfaction of the Board to be of such description or nature that some deduction from the quantity deemed to have been brewed should be made, the Board shall make such a deduction from that quantity as will in its opinion afford just relief to the brewer.

(4) In paragraph (2) of this regulation, the expression "**sugar**" includes-

- (a) any saccharine substance, extract or syrup;

- (b) rice;
- (c) flaked maize and any other description of com which in the opinion of the Board is prepared in a manner similar to flaked maize;
